Dear Senator:

We, the undersigned, would like to bring to your attention A-1937, a pilot program for the low cost neutering of dogs and cats.

This type of program is long overdue; society must control the over population of unwanted pets for economic and humanitarian reasons. The current costs, health problems and suffering resulting from the capture and destruction of these animals is prohibitive and avoidable.

Please, give this program your full support and work to make it permanent.
